Trailer bearings getting hot, is this normal? | Boating Forum Jun 27, 2012 — Your probably OK but that does seem pretty hot. The grease might be from excess expanding from the heat. Jack up each wheel and make sure How warm should hubs feel? When to worry - Jayco RV Jul 8, 2013 — I got the trailer last summer and previous to that it sat unused for 3 years. Take 10 min side you said you saw grease and make sure you don't hear to retain heat and get hotter than just packing the bearings themselves

How hot should trailer hubs get? - PWCToday Jun 5, 2014 — I just replaced the bearings in our trailer. Mine do not get hot at all, i can grab them by hand aftet hours of freeway driving without any issues Trailer Bearings; How Hot is to Hot [Archive] - Ausfish fishing They will get hot to touch but not hot enough to burn with a short touch. It's a judgement thing. If you place the back of your hand on the hubs and can hold it for a couple of seconds it should be fine. I have a Dunbier trailer for a 5.4m boat and when have checked after a run usually are only very warm to touch
